

# HP E

Customer Success Story - Federal Government Entity

## **Enterprise-Grade Data Platform Engineered for Performance and Retention at Scale**

# Project Overview

Delivery, deployment & services for a modern data management solution centered on the HPE MSL3040 Tape Library with LTO-9 technology, enabling secure, air-gapped, and long-term data retention

Faster backups, reliable data protection, simplified archiving, and scalable capacity reaching 900TB with long-term retention for a federal gov entity responsible for managing mission-critical essential citizen services portals.

Comprehensive deployment services, solution integration with Veeam Enterprise backup + replication and hands-on training for users, supported by 5 years of 24x7 enterprise-grade support to ensure resilience and continuity
