

INFO SERV 360^o

Client Success Story

Manufacturing Industry

INFO SERV 360^o deployed & supplied the cutting-edge, **HPE Superdome Flex 280 Server** with High-End GPUs for a leading manufacturer, integrating compute & resource intensive 3D simulation tools & engineering software

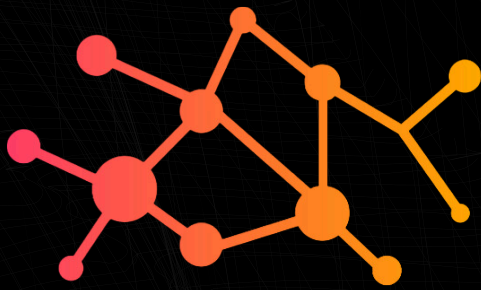

INFOSERV360°

Client Challenge

The manufacturer **struggled with limited computational power for complex simulations.** They needed high-performance compute to efficiently run enterprise-grade 3D simulation & engineering software along with expert integration support

INFOSERV360°

Impact & Outcome

The solution INFOSERV360° provided gave the necessary computational power, enabling seamless operation of 3D simulation & engineering software.

We **engaged with NUST** for specialized services, this **resolved the manufacturer's simulation bottleneck**, significantly improving efficiency and reducing processing times
